Smart Expense & Budget Management App

MoneyMate is a personal finance app designed to help users track their daily expenses, manage monthly budgets, and make better spending decisions.

MY Role

UI/UX Designer

Tools

Figma

Duration

3 Weeks

Platform

Web Design

The Problem

Managing daily expenses can be difficult when spending is spread across different categories and users don't have a clear view of their remaining budget.

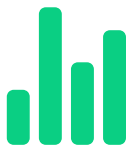

The Goal

Making money management simple, clear, and actionable.

Design a simple and easy-to-understand finance dashboard that helps users track expenses, manage budgets, and make informed spending decisions.

Track

Track daily expenses and understand spending patterns.

Plan

Set budgets and manage monthly spending effectively.

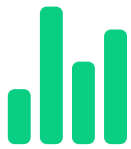

Improve

Get useful insights and tips to make better spending decisions.

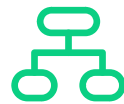

Research & Insights

To understand common challenges in managing personal expenses, I looked at my own spending habits and discussed budgeting difficulties with people around me.

Expense Tracking

Daily expenses are often small and easy to forget, making it difficult to know where money is going.

Budget Awareness

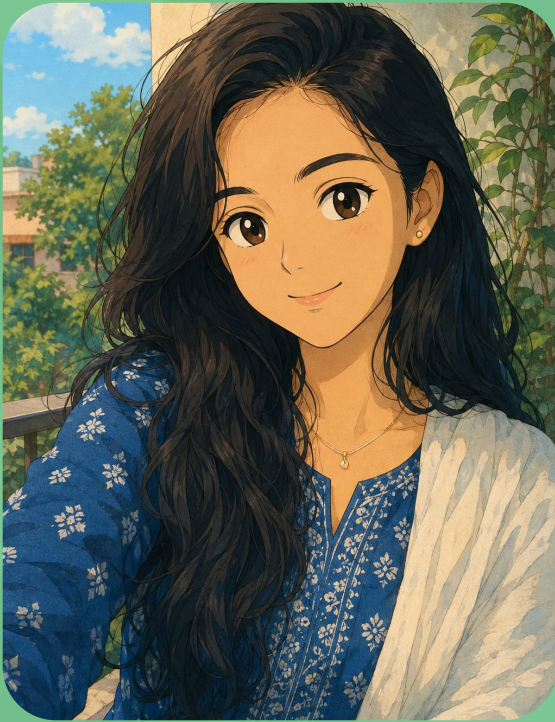

Users may set a monthly budget but don't always know how much they have left to spend.

Spending Patterns

Without a clear category-wise view, it can be difficult to identify areas where spending can be reduced.

Users need a simple way to track expenses and understand their remaining budget without going through complicated financial data.

Sri lakshmi | 23

College Student

Coimbatore | Hostel

Wants to manage her monthly income better but finds it difficult to track small daily expenses.

Goals

- Track daily spending
- Stay within monthly budget
- Understand where money is going
- Save money for future plans

Pain points

- Forgets to record small expenses
- Doesn't know remaining budget at a glance
- Spending gets higher than planned
- Difficult to identify unnecessary spending

Needs

- Simple expense tracking
- Clear budget progress
- Category-wise spending insights
- Useful budget suggestions

Login | SignUp

Create an account to start managing personal finances.

Create Profile

Add basic details and preferences to personalize the experience.

Set Monthly Budget

Set a monthly spending limit based on the user's financial needs.

Home Dashboard

Get a quick overview of budget, expenses, and remaining balance.

Add Expense

Record daily expenses and assign them to relevant categories.

View Budget

Monitor spending against the monthly budget and view category-wise expenses.

Track Spending

User logs in or creates a new account.

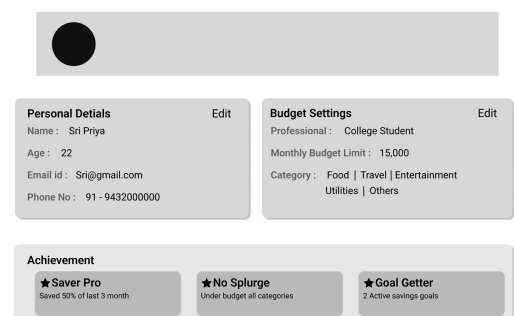

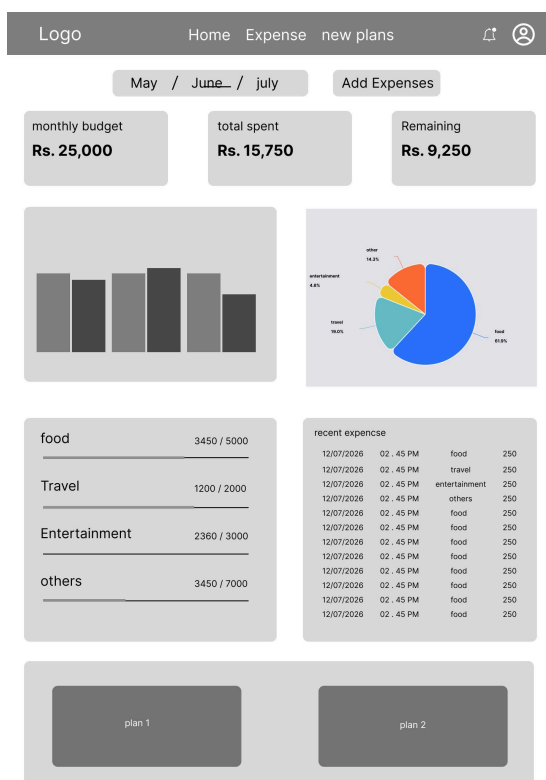

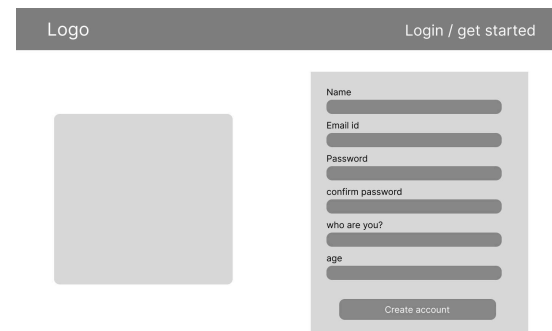

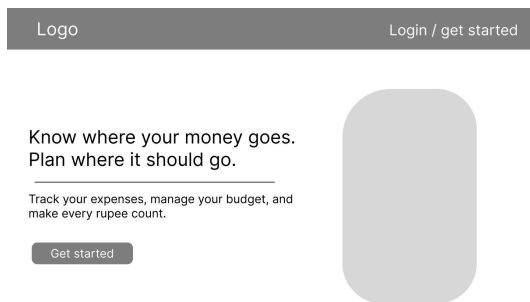

Budget Tips

Get simple suggestions based on spending patterns to help manage the remaining budget.

Wireframes

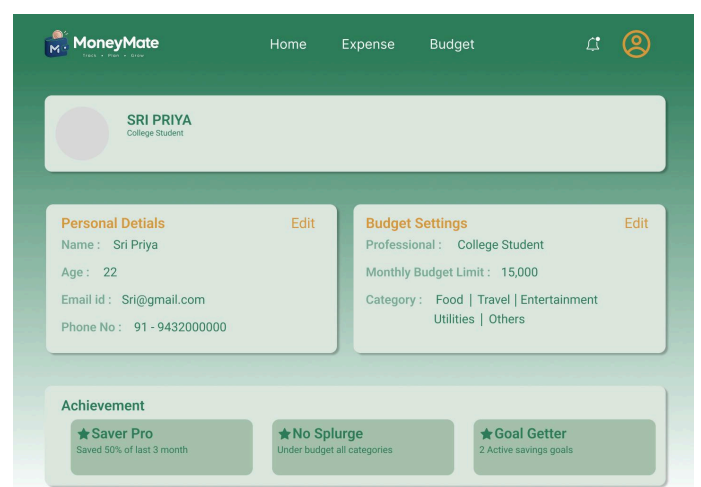

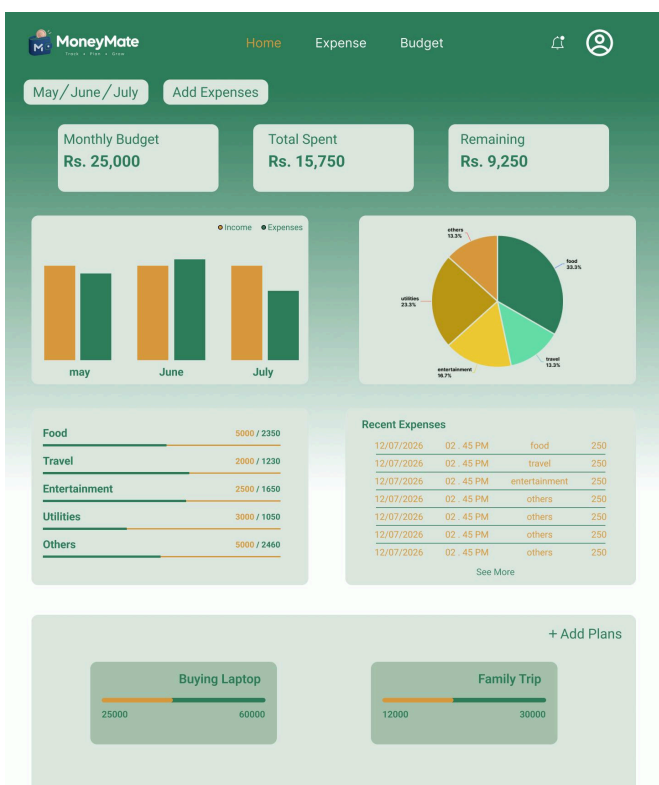

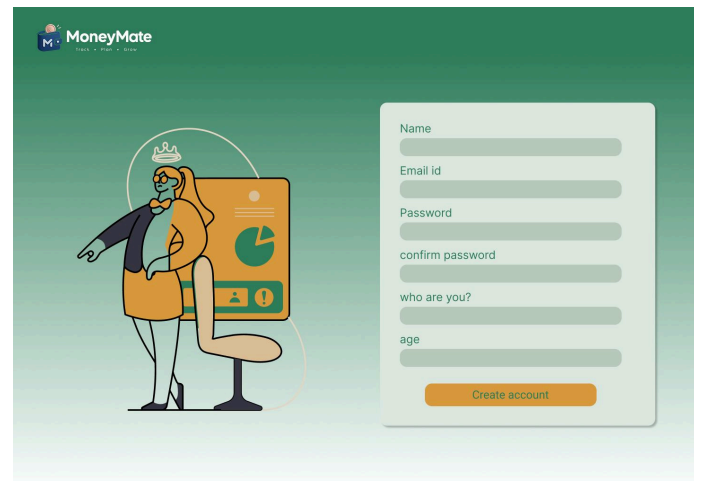

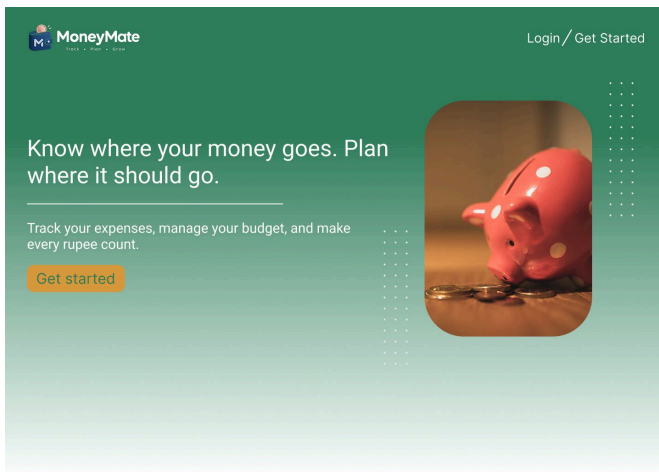

Before creating the final UI, I created low-fidelity wireframes to plan the layout, content hierarchy, and user flow of MoneyMate.

UI Design

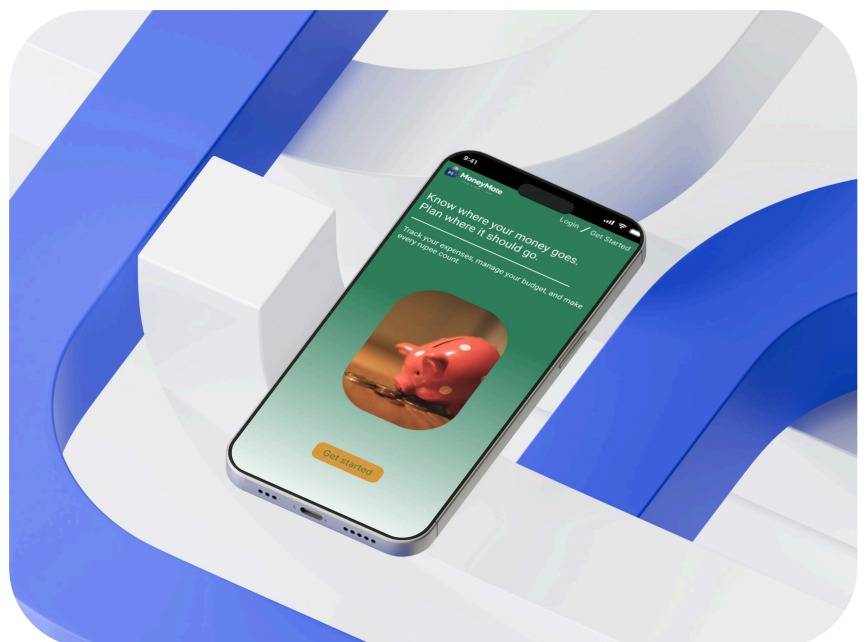

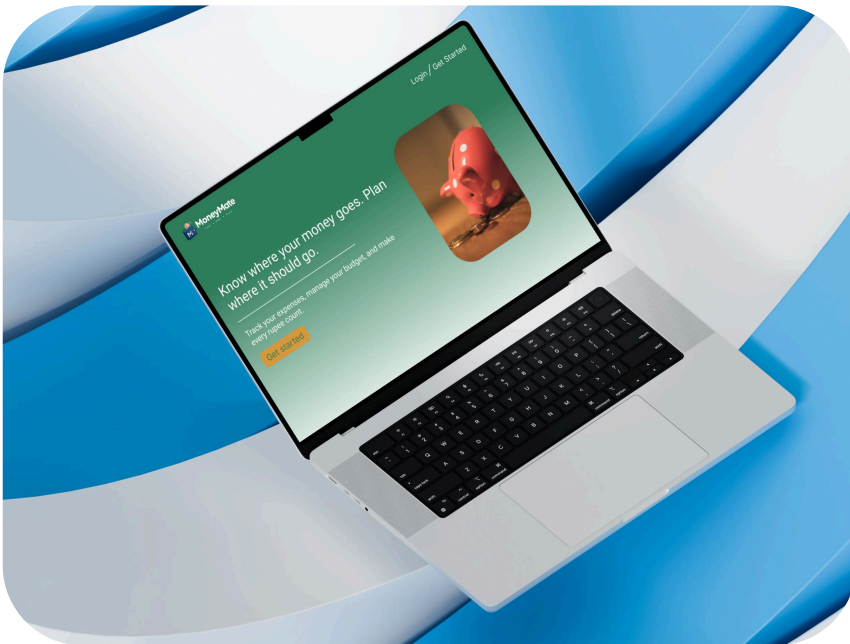

After finalizing the wireframes, I transformed the structure into a clean and user-friendly interface. The design focuses on making budgeting and expense tracking simple, clear, and easy to understand.

Bringing MoneyMate to Life

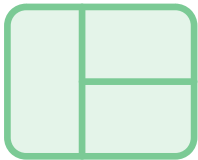

I visualized MoneyMate as a real-world product by presenting the final interface in desktop and mobile mockups. This helped me see how the design works across different screen sizes and devices.

Design Decisions

I made design decisions based on the goal of keeping expense tracking simple, clear, and easy to understand for everyday users.

Clear Visual Hierarchy

Important information such as balance, budget, and spending is given visual priority so users can understand their financial status quickly.

Simple Navigation

The navigation is kept simple so users can easily access key sections such as Home, Expenses, Budget.

Easy-to-Understand Data

Charts, progress indicators, and category-based information help users understand their spending without reading too much text.

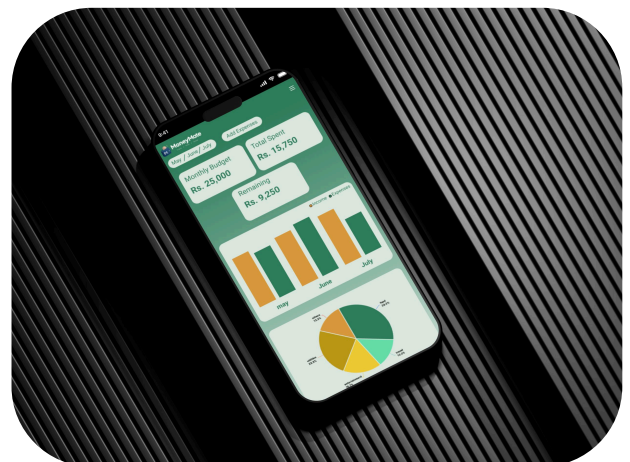

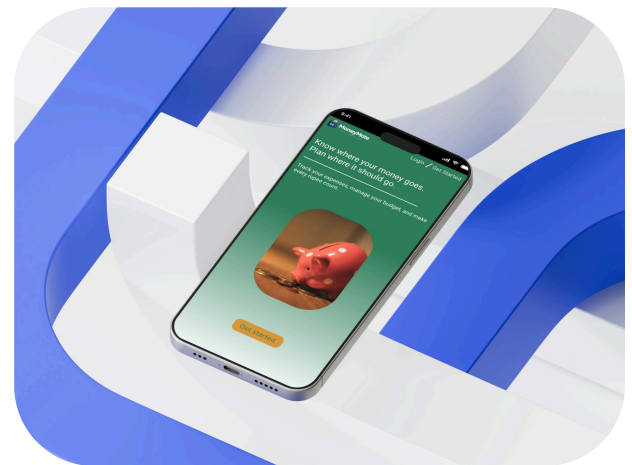

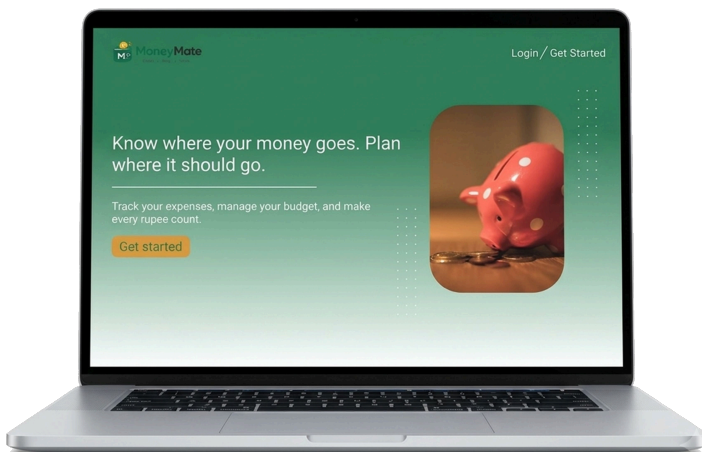

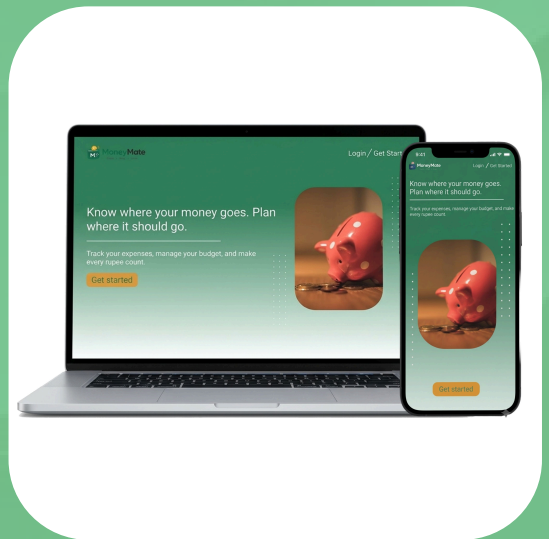

Consistent Components

Cards, buttons, spacing, and typography are kept consistent throughout the interface to create a familiar and cohesive experience.

Responsive Design

I adapted the MoneyMate interface for different screen sizes while keeping the core experience consistent and easy to use across desktop and mobile devices.

Final Outcome

MoneyMate brings budgeting and expense tracking into a simple, organized experience. The final design helps users monitor their spending, manage their budget, and stay aware of their savings goals.
