

JOB PORTAL UI/UX Case Study

Designed by
vincy Sharmila

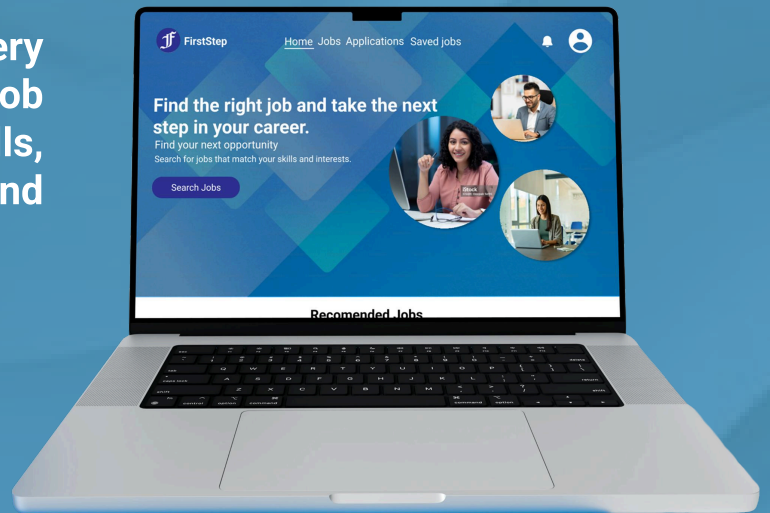

A smarter way to discover relevant jobs

project description

FirstStep is a conceptual job discovery platform that recommends relevant job opportunities based on a user's skills, experience, preferred location, and career preferences.

MY Role

UI/UX Designer

Tools

Figma

Project Type

Conceptual
Personal Project

The Problem

Job searching can be time-consuming and overwhelming.

Job Seekers struggle to find relevant opportunities that match their skills, experience and preferences.

Too Many Job Sources

Searching across multiple job portals takes time and effort.

Irrelevant Job Listings

Many listings may not match the user's skills, experience, or location.

Time-Consuming Search

Finding and comparing suitable jobs manually can be frustrating.

The Opportunity

How might we help job seekers discover relevant opportunities faster, without having to search multiple platforms manually?

Understanding the Users

To understand the challenges job seekers face while searching for relevant opportunities.

Users need relevant job opportunities that match their skills and preferences. A simpler search experience can help them find suitable jobs faster.

Finding Relevant Jobs

Job seekers want job recommendations that match their skills, experience and preferred location.

Too Much Manual Searching

Users spend time checking multiple job platforms to compare suitable opportunities.

Better Job Matching

Users prefer a simpler way to discover jobs that are relevant to their career goals.

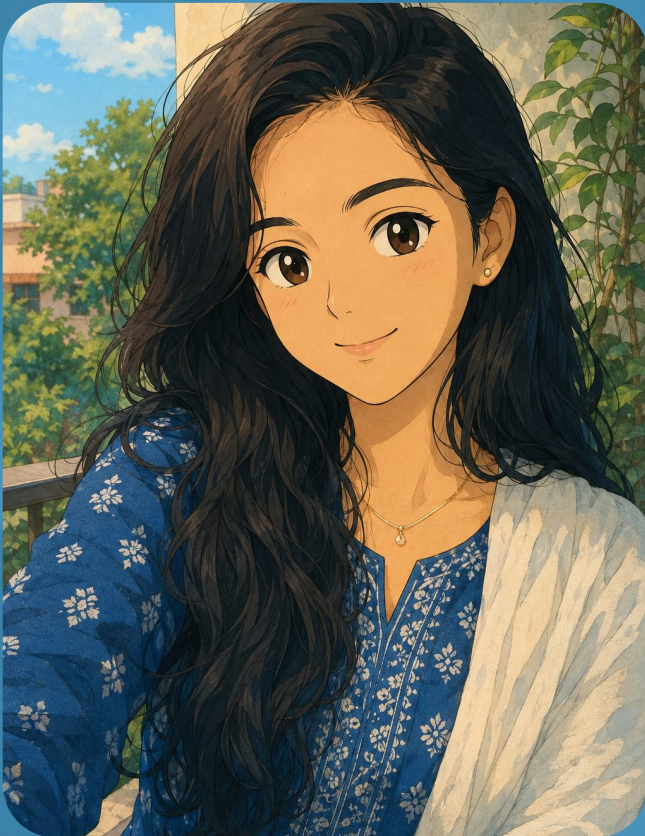

Key Insight

Job seekers need a simpler way to discover relevant opportunities without manually searching through multiple job platforms.

User Persona

Meet a typical FirstStep user.

Priya Kumar | 24
Frontend Developer
Trichy
2 years experience

Priya is looking for a frontend development role that matches her skills, experience and preferred location.

Goals

- Find relevant jobs quickly
- Match skills with jobs
- Find preferred locations

Frustrations

- Irrelevant listings
- Multiple job portals
- Difficult comparison

Needs

- Personalized recommendations
- Simple search
- Relevant job details

User Flow

A simple journey from profile setup to finding relevant jobs.

Login | SignUp

User logs in or creates a new account.

Create Profile

User adds basic details and experience.

Add Skills & Preferences

User adds skills, job role, location and expected salary.

Recommended Jobs

FirstStep shows relevant opportunities from multiple sources.

View Job Details

User checks job requirements and company details.

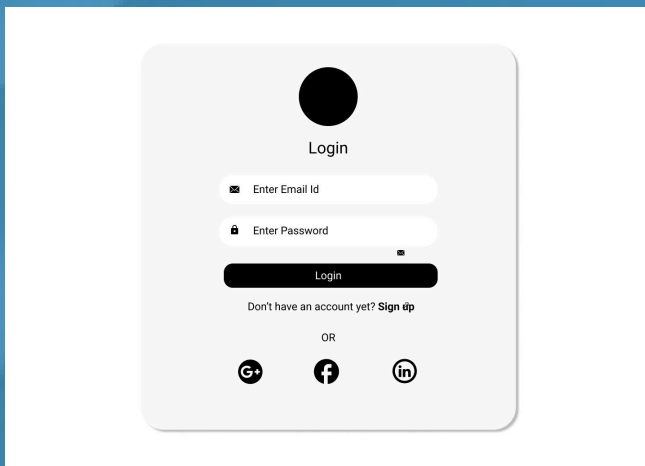

Apply on External Job Portal

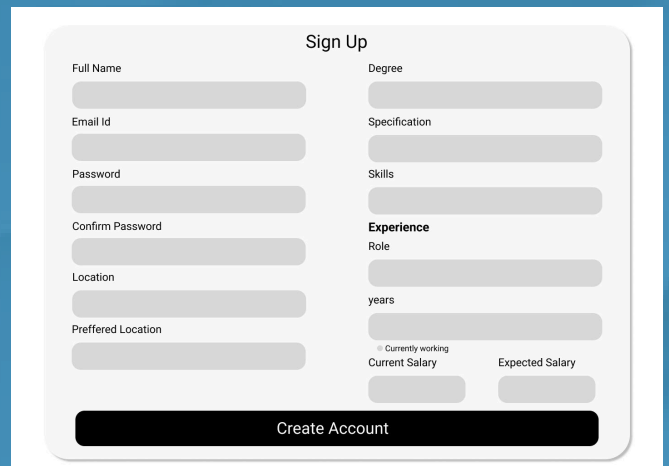

User is redirected to the original job portal.

Wireframes

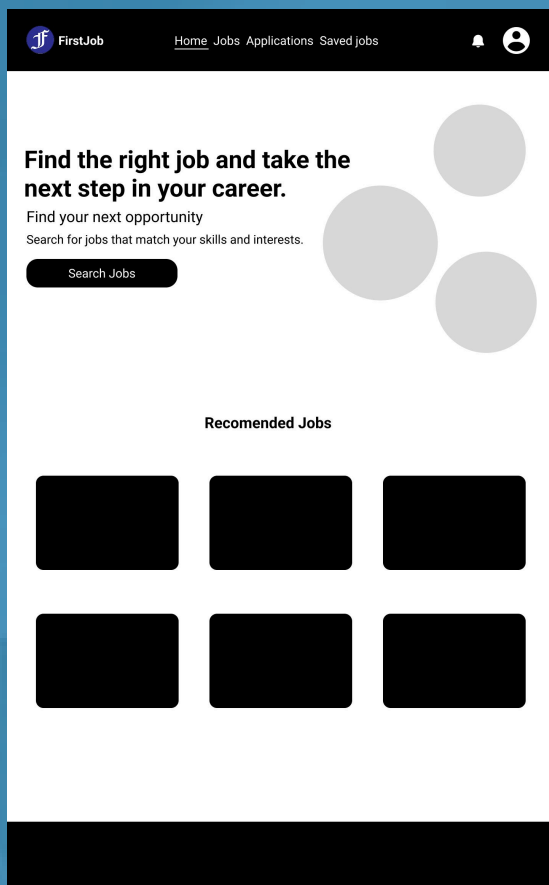

Exploring the structure and layout before creating the final UI.

Wireframe for the Login page. It features a central card with a circular profile picture placeholder, the text "Login", and two input fields labeled "Enter Email Id" and "Enter Password". Below the inputs is a "Login" button. A link "Don't have an account yet? Sign up" is positioned below the button. At the bottom, there is an "OR" separator and three social media icons: Google+, Facebook, and LinkedIn.

Wireframe for the Sign Up page. It features a central card with the title "Sign Up". The form is divided into two columns. The left column contains input fields for "Full Name", "Email Id", "Password", "Confirm Password", "Location", and "Preferred Location". The right column contains input fields for "Degree", "Specification", "Skills", "Experience" (with a sub-label "Role"), and "years". Below the "Experience" field, there are two sub-sections: "Currently working" with "Current Salary" and "Expected Salary" input fields. A "Create Account" button is located at the bottom of the card.

Wireframe for the Home page (left view). It features a header with the "FirstJob" logo and navigation links: "Home", "Jobs", "Applications", and "Saved jobs". A search icon and a user profile icon are on the right. The main content area includes a promotional message: "Find the right job and take the next step in your career." followed by "Find your next opportunity" and "Search for jobs that match your skills and interests." Below this is a "Search Jobs" button. A section titled "Recommended Jobs" displays a grid of six job cards, each represented by a black rectangle.

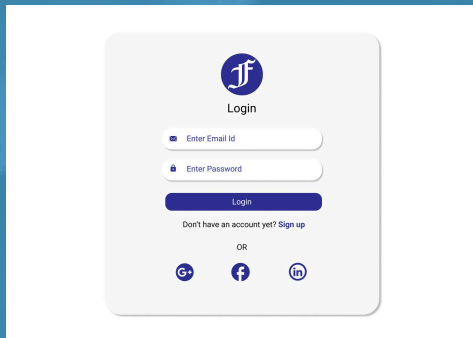

Wireframe for the Home page (right view). It features a header with the "FirstJob" logo and navigation links: "Home", "Jobs", "Applications", and "Saved jobs". A search icon and a user profile icon are on the right. The main content area displays a list of job cards, each represented by a black rectangle. To the right of the list are four filter buttons: "Location", "Job Role", "Salary", and "Experience", each with a dropdown arrow.

CONCLUSION

Designing a Simpler Job Search Experience

FirstStep was designed to make job discovery simpler by connecting users with relevant opportunities based on their skills and preferences.

Key Outcome

Created a simple job discovery experience focused on relevant job recommendations.

What I Learned

Improved my understanding of user flows, wireframing, visual design and creating a complete UI/UX case study.

Future Improvements

Add real-time job data, advanced matching and personalized recommendations.

Helping job seekers take the right first step toward their next opportunity.

Thank You
